

Advisory services across the climate value chain

Climate Finance Advisory | Policy Advisory | Technical Services

Climate Platform Consulting Practice

Given the state of global climate emergency, organizations that implement climate projects need today, more than ever quicker access to climate finance. National and sub-national governments need qualified support to set and implement effective climate policies. Sponsors with low-carbon or climate resilient projects need stronger delivery capacity.

Swift climate finance, effective climate policies and improved delivery capacity is what we do at the Climate Platform.

Our consulting practice combines deep expertise in mobilizing climate finance, delivering on climate projects, with the power of a very specialized network of consultants.

I am excited to publish our offering. Please feel free to contact me or any team member to learn more about how we can expand the potential of your climate ideas.

Pierre Telep,
Head of Climate Advisory Services

WHAT WE DO

CLIMATE FINANCE ADVISORY

We unlock climate finance by structuring climate ideas into bankable and well-designed climate projects, concept notes and funding proposals.

POLICY ADVISORY

We support the preparation, formulation and deployment of climate related policy instruments through studies and strategic advisory.

TECHNICAL SERVICES

We assist our clients with technical knowhow through services that help implement climate projects on time, as planned and within budget.

SECTORS OF FOCUS FOR CLIMATE FINANCE

RENEWABLE ENERGY

Services in support to generation and access to clean energy

AGRICULTURE

Services in support to climate resilient agriculture and food security

WATER SECURITY

Services in support to improving water security

EARLY WARNING SYSTEMS

Services in support to disaster risk reduction through timely information dissemination

THEY TRUST US

Core operational principles

Mission statement

To assist international, regional and private sector organizations create value in areas that achieve climate mitigation and adaptation as well as support countries to adopt low-emission and climate-resilient pathways.

Expertise

Our field of expertise includes climate finance, institutional assessment, climate policy advisory, climate strategic advisory, technical assistance and climate knowledge. We are a dedicated firm that focuses on creating value on initiatives that result either in increased resilience or mitigating the negative effects of climate change.

Mandate

We are mandated by the state of global climate emergency recognized by 194 countries
